- Flexible subscription plans.

Subscription Options:

Foyer

- 1 year Foyer Screen subscription
- 3 year Foyer Screen subscription

Room

- 1 year Room Screen subscription
- 3 year Room Screen subscription

Easy To Use

The Concierge Cloud software interface is simple to use, even for beginners, leaving staff time to deal with the busy schedule of hosting guests and delegates. Our philosophy with Concierge Cloud is about working smarter, not harder. We've created software that's not only easy to use, but provides great functionality that's completely flexible.

Cloud Based Software

Being Cloud based, users are able to update, add and edit events online from any computer or device with an Internet connection. Unlimited users can be added with a secure username and password giving access to multiple members of your team.

The flexibility of a Cloud-based solution means you can add as many meeting room and foyer screens as your budget allows. Being Cloud based you only pay for each screen so there's no need for servers or software to be installed on local PCs. This provides the opportunity for a staged roll-out to meet your budget requirements.

Aeris Concierge Cloud

Upgrade Your Signage, Keep Your Hardware
Even if you already have a digital signage installation, you can upgrade to the Cloud. Aeris Concierge Cloud will run on a range of operating systems, including Windows, SMIL and Samsung SSP panels.

Diverse Content on Display

Whatever information you need to display - room names, company names, company logos, directional arrows, or floor levels - this system can handle the content load. Meeting times can all be shown on the screens to offer a detailed schedule to your clients. Which means everybody can check the right time, and the right location at a glance.

Primed for Promotion

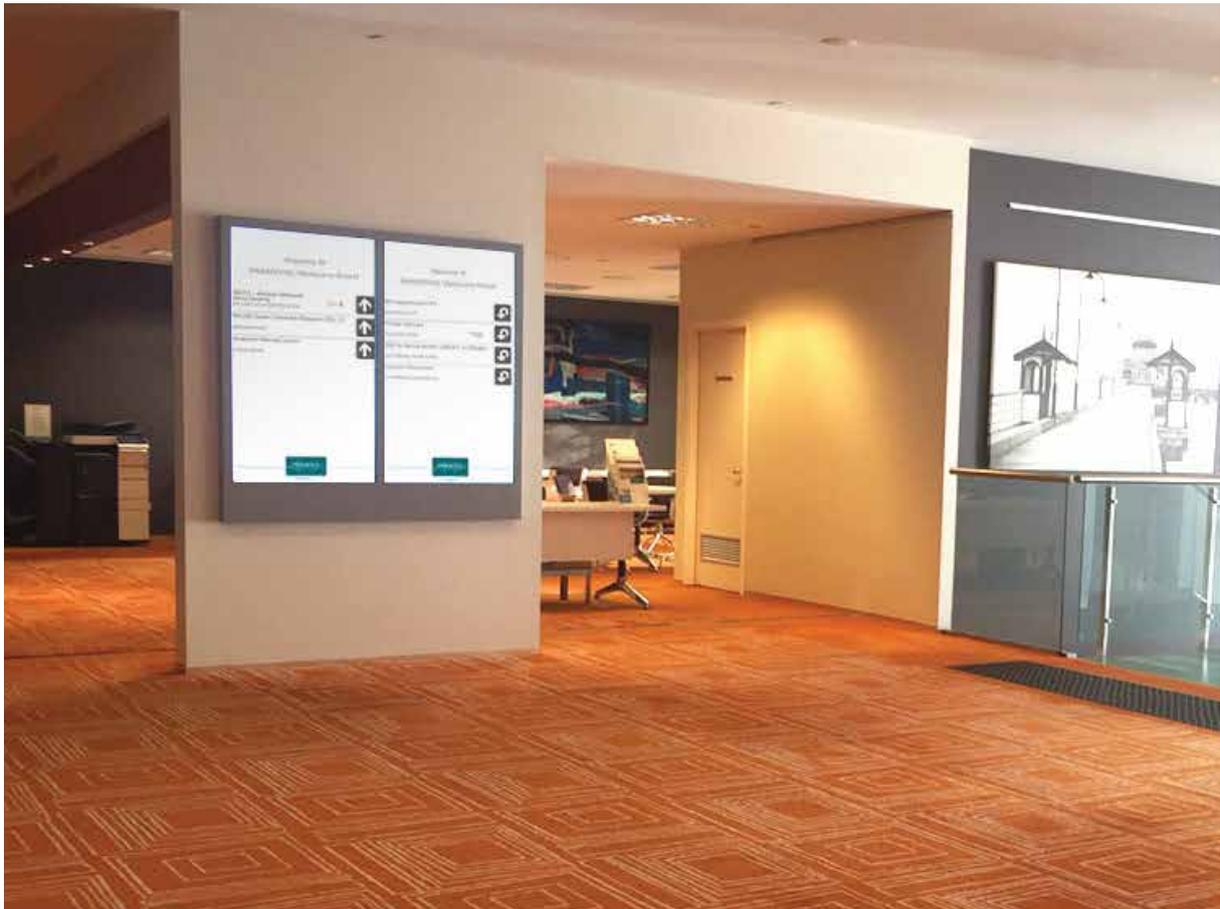

When your screens aren't being used for events and meetings, Concierge Cloud can run your marketing content to maximise your brand power. Promote weekend packages, new bars, restaurant specials, local stores, day spas and much more using the digital directory board.

Aeris Concierge Cloud

Move Forward With Icons

It's one thing to tell people to go to the Grand Ballroom, but chances are they won't know where that is. Concierge allows you to program screens to show icons such as arrows, lifts, and escalators so that delegates and visitors can use visuals to find their way around.

Free Support Service

Aeris Concierge Cloud is not just software, it is a service. Our Support Team is online to assist you with any questions you may have. We provide free support and software updates, with no hidden fees so you can be sure to find the answers you need whenever you need them.
